

# iBright Imaging System

## Live demo

When: 24<sup>th</sup> November 2022

Location: **Policlinico di S.Orsola – build. 20**

- Centre for Applied Biomedical Research (CRBA), floor 4
- Aula Bugiardini, ground floor

## Stunningly easy western blot imaging

**iBright Imager**, the new powerful, easy-to-use western blot and gel documentation system from **Invitrogen**. Capture visible, RGB and near-infrared fluorescence-based western blots and gels, chemiluminescent western blots, and colorimetric stained protein and DNA/RNA gels.

### AGENDA

**10.00 - 10.30:** *Presentation: Innovative iBright imaging systems*

**10.30 – 11.45:** *Guided hands-on demonstration (chemiluminescence, fluorescence RGB + Near IR, nucleic acids detection, protein staining)*

**11.30 - 13.00:** *Capturing images from samples (membranes and gels) provided by the participants\**

\*more time could be allocated in the afternoon if necessary
