1 PRIORITIES FOR 2025 – 2026

During the Ocean Decade reporting period January 2025 – December 2026, the DCC-CR Partners Alliance Network will work towards achieving the following expected results:

SI IMPROVE SCIENCE INFORMATION FOR ALL

Design and implementation of a knowledge hub on coastal resilience, including catalogues of case studies and actionable scientific insights, added with contribution from local communities and centred on information delivered with podcasts and webinars, among others

31.12.2025

Increased dissemination of knowledge through collaborative scientific publications and foundational papers with the international community

31.12.2026

Promote coastal community science (e.g., through workshops with the EuroGOOS Coastal Working Group, promoting coastal software at the Deltares Software Days, promote GOOS CoastPredict program

30.06.2026

Contribute to (and expand in 2026) the OS Session at EGU2025: The Global Coastal Ocean: multi-hazard Early Warning System for coastal resilience

<https://meetingorganizer.copernicus.org/EGU25/session/52579>

SE ENHANCE STAKEHOLDER ENGAGEMENT

Mapping of coastal stakeholders

31.12.2025

Participation at EU Digital Platform event UNOC3, Nice

30.06.2025

Biennale Venezia 2025

30.10.2025

Effective mapping of coastal stakeholders for coastal resilience mapping (PhD project)

30.06.2025

Development and deployment of digital dialogue tools to facilitate equitable interactions (Knowledge Hub on Coastal Resilience)

31.12.2026

Organization of workshops and hackathons to foster collaboration, innovation, and the practical application of coastal resilience tools

30.06.2026

EE PROMOTE EQUITABLE EDUCATION AND TRAINING

Management of DCC-CR School on Coastal Resilience coordinated with IOC-UNESCO OTGA and completion of “Co-Growth” course

31.12.2025

Implementation of an Itinerant Summer School on Coastal Resilience, prioritizing countries in the Global South and indigenous communities

30.09.2026

Organisation of workshops on coastal climate adaptation fostering in particular the participation of ECOPs and the Global South

31.12.2026

Continuation of the CoastPredict training course series “Coastal modeling for protection and conservation of natural resources” (COMPASS)

30.06.2026

UPHOLD ENVIRONMENTAL JUSTICE FOR COASTAL COMMUNITIES

Select possible case studies and promote international projects, prioritising LDCs and SIDS locations

31.12.2026

Design coastal stakeholder dialogue tools, leveraging new funding opportunities to develop innovative and community-specific proposals

30.06.2026

CROSS-CUTTING ACTIVITIES

Global South Coast: Provide tailored assistance to scientific institutions, co-organize sessions and side events at major science meetings, Explore and pursue existing and new funding mechanisms

31.12.2026

Community of Practice: continued monthly Webinars and organisation of web pages on the UN Decade Forum for affiliated actions, coordination with Future Earth Coast initiative

31.12. 2026

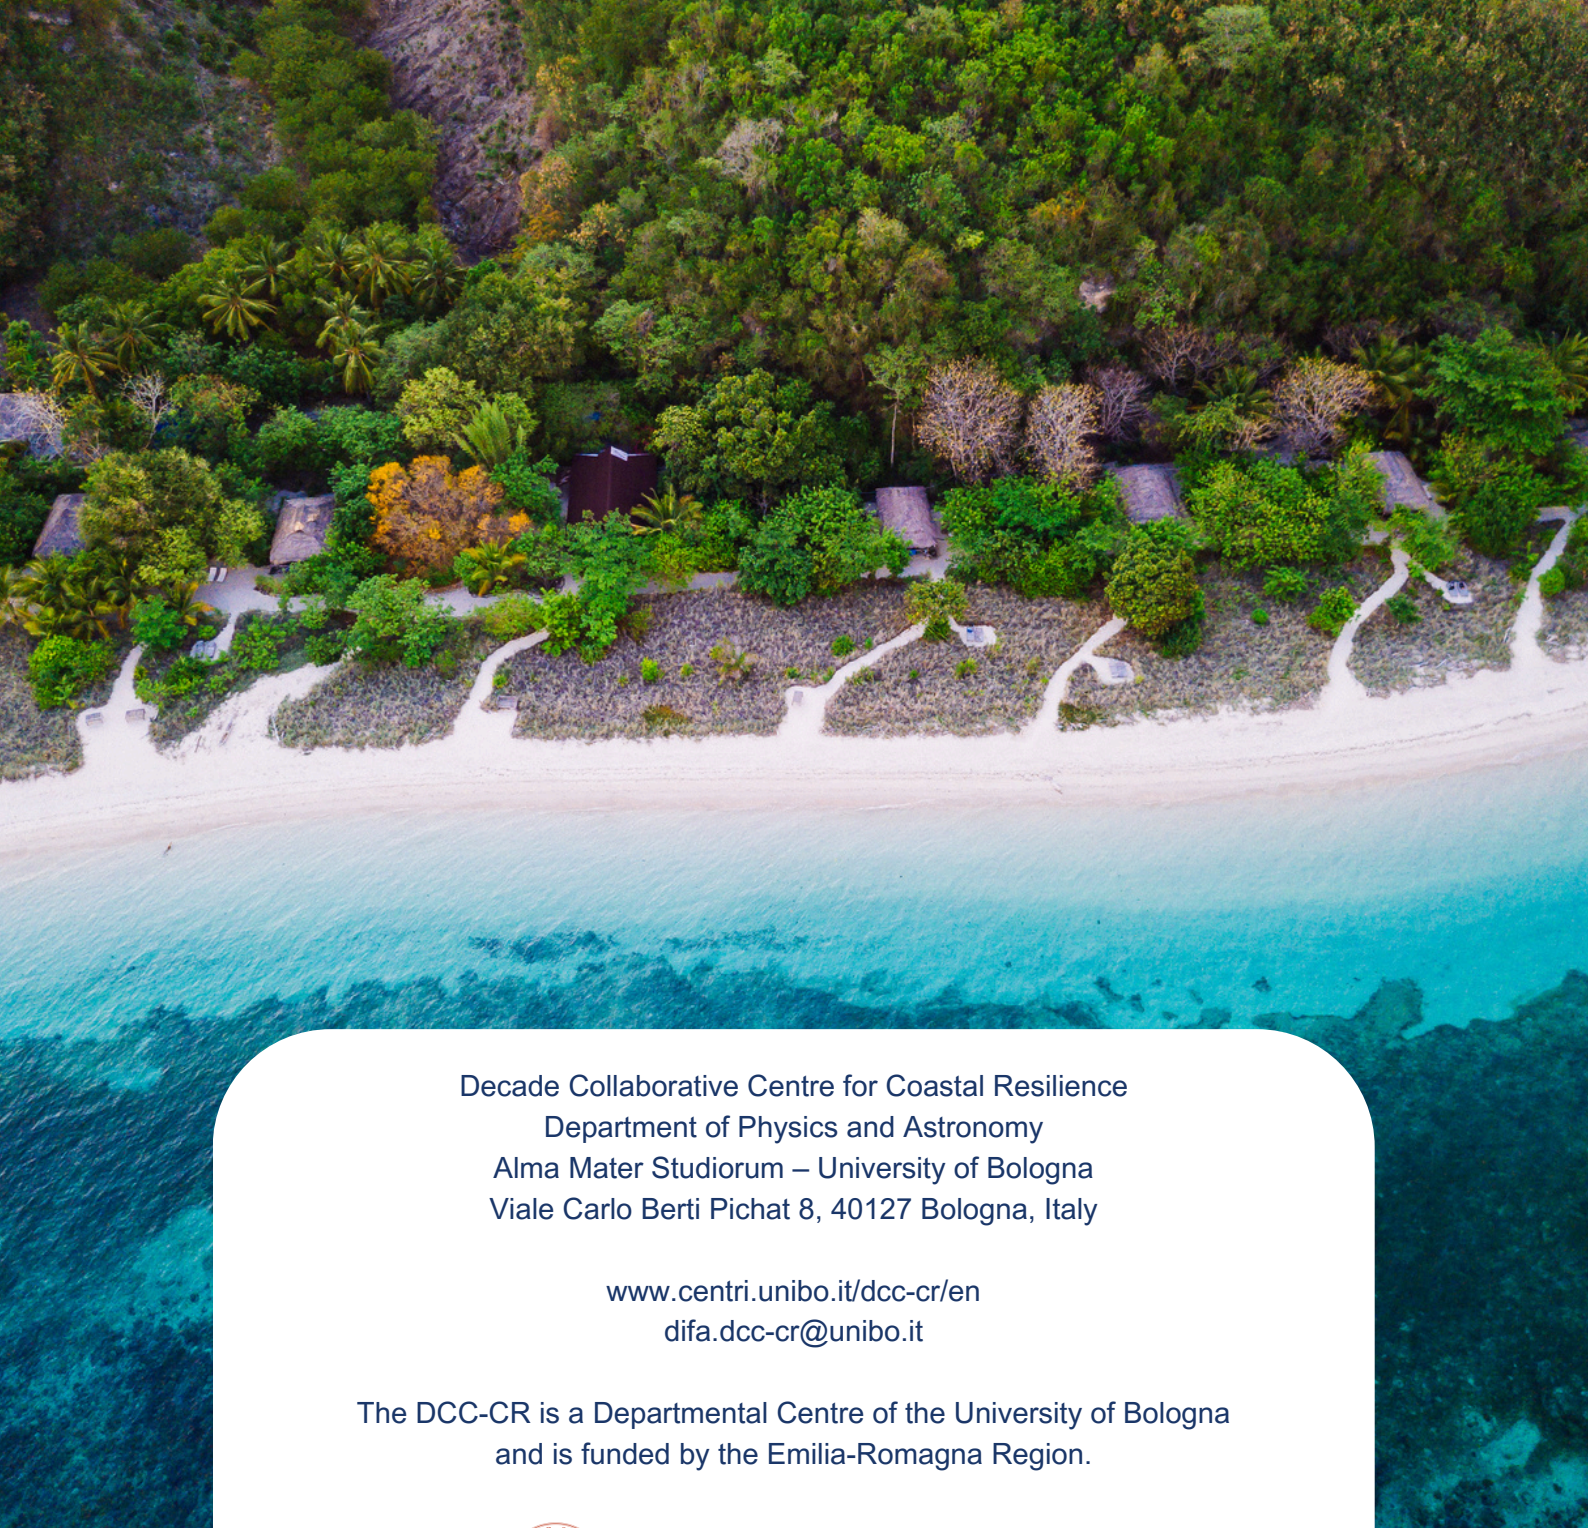

Cities with the ocean: Contribution to related platforms and events

31.12. 2026

GlobalCoast Initiative: support the coordination of the implementation Projects in the 130 GlobalCoast Pilot Sites

31.12.2026

Decade Collaborative Centre for Coastal Resilience
Department of Physics and Astronomy
Alma Mater Studiorum – University of Bologna
Viale Carlo Berti Pichat 8, 40127 Bologna, Italy
